# Welcome

**Welcome** to Happy Pet's latest new pet thinking.

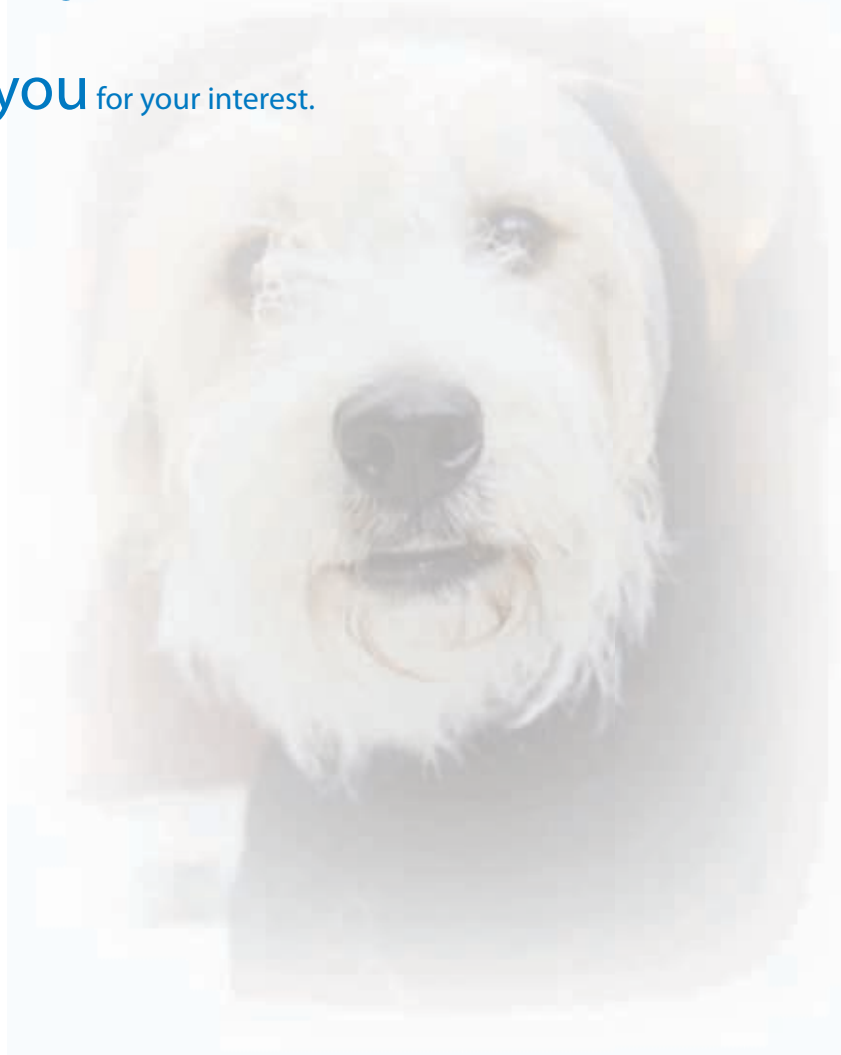

The Happy Pet catalogue is back with over 113 pages of **inspired ideas and innovations** for pet product retailers.

Designed for quick and easy reference, you'll find dedicated sections for **dog, cat, bird and small animal** products. We've also added useful sub-sections for **toys, treats, health, home, bedding & clothing**, and an all new pet travel section.

Pet **health, happiness & wellbeing** is our passion, with every product **perfectly crafted** and constructed to support the **natural instincts** and lifestyles of each animal. Throughout the catalogue you'll find unique ideas for pets **at play**, pets **at home**, and pets **on the move**.

With over **40 years experience**, it's safe to say that we understand the needs of **retailers** too. We reliably deliver **best selling** pet products at **great value** prices to customers worldwide, with **first class service** and customer support guaranteed.

**Thank you** for your interest.

## ECOSYSTEM

Maintaining a Reef aquarium has never been more simple - Use Miracle Mud to replenish your aquarium's concentration of minerals and trace elements, creating an ideal environment for fish, corals and invertebrates.

### Ecosystem Miracle Mud- Salt Water

The key component in the EcoSystem filter systems. It contains many essential elements and is an ideal substrate in refugiums where vigorous macro-algae growth is desired.

Miracle Mud  
Fresh Water

Miracle Mud  
Salt Water

### Ecosystem Miracle Mud- Fresh Water

Miracle Mud Fresh Water will continually replenish your aquariums concentration of trace elements and minerals to create an ideal fresh water environment. Miracle Mud also contains anaerobic micro-organisms that denitrify the aquarium leading to a pristine home for your fish.

### The Ecosystem Filtration

"The Ecosystem takes proteins (foods, fish faeces, etc...) and it breaks it down to ammonia, to nitrate, to nitrate and then to nitrogen gases. A complete breakdown of protein".

Miracle Mud is a product of the EcoSystem Aquarium the composition is 80% oceanic mud, harvested from deep underwater and then dried on land. The remaining 20% is a scientific formulation of minerals and trace elements.

Miracle Mud will continuously replenish your aquarium's concentration of minerals and trace elements creating an ideal environment for both fish and corals/invertebrates. Miracle Mud makes the most efficient refugium substrate due to its fine consistency it produces distinct aerobic and anaerobic layers that enable it to be both an excellent nitrifier filter substrate as it only requires a depth of 2.5cm in comparison to other brands which on average require up to 15cm.
